WHAT IS FOREX

Forex trading, or **foreign exchange trading**, refers to the buying and selling of currencies in the global marketplace. It involves trading one currency for another in pairs, such as the EUR/USD (Euro/US Dollar) or GBP/JPY (British Pound/Japanese Yen). Forex trading happens in a decentralized market, meaning there's no central exchange like in stock trading. Instead, currencies are traded directly between parties, usually through brokers or financial institutions.

The goal of forex trading is to profit from changes in exchange rates between two currencies. For example, if you think the value of the Euro will rise against the US Dollar, you might buy the EUR/USD pair. If the Euro strengthens, you can then sell it for a profit.

The forex market is one of the largest and most liquid markets in the world, with daily trading volumes exceeding \$6 trillion.
